DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 15-20, drawn to a land grid array, classified in class 257, subclass
 698.
- II. Claims 1-9, drawn to a method, classified in class 438, subclass 15+.
- III. Claims 21-29, drawn to a system, classified in class 361, subclass 749+.
- IV. Claims 10-14, drawn to a membrane, classified in class 528, subclass 358+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a materially different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, instead of being formed by flexible circuit technology, it can be performed by formed by a socket of the land grid array.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
